Tendon Injury and Reconstruction

Message from the Guest Editors

Tendon injuries are among the most common problems in professional and amateur athletes. Injuries are often due to overtraining. The most common tendon injuries include tendinitis (inflammation of the tendon caused by repetitive movements), tendinosis (degeneration of the tendon due to untreated microtrauma), and tendon rupture. Patients present localized pain, swelling, stiffness, and difficulty moving.

Tendon injuries are a common problem for athletes, but they can be effectively managed with early diagnosis and targeted treatment. Physical therapy and rehabilitation techniques play a crucial role in recovery, while surgery is the last option in more severe cases.

The scope of the Issue is intentionally broad to encourage the coverage of a wide range of topics and perspectives related to tendon injury management. This includes both non-pharmacological and pharmacological treatments, as well as pain management, epidemiology, and health promotion. Understanding tendon injuries as much as possible allows for the development of the most appropriate treatment for these conditions, improving professional and amateur athletes' health and enabling an early return to sport.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
