

## Special Issue

# Recent Trends in Physical Therapy for Musculoskeletal Disorders

### Message from the Guest Editors

This Special Issue aims to highlight recent trends in physical therapy for musculoskeletal disorders, with a particular emphasis on novel assessment techniques, advanced therapeutic interventions, and personalized rehabilitation protocols. We welcome original research, systematic reviews, and meta-analyses on topics such as wearable technology, imaging modalities, machine learning for precision diagnosis, and innovative therapeutic approaches (e.g., dry needling, manual therapy, exercise prescription). Furthermore, we encourage submissions that explore movement retraining, neuromuscular re-education, and the integration of biomechanical, psychological, and lifestyle factors in treatment planning.

This Special Issue seeks to bridge the gap between traditional methods and emerging practices, providing an updated and comprehensive resource for advancing the clinical management of musculoskeletal disorders.
