

Special Issue

Diagnosis and Treatment of Severe Asthma

Message from the Guest Editor

Considering the fact that asthma affects millions of patients in different countries. The obvious link between SUA in children and the development of COPD later in life makes it imperative that the SUA is managed appropriately and full controlled is achieved.

Medicina is launching a Special Issue entitled "Diagnosis and Treatment of Severe Asthma". The aim of this Special Issue is to explore the issues related to the pathogenesis of SUA, with special attention paid to its phenotypes and the role of complicating factors which affect its management.

We are pleased to invite submissions of original articles concerning basic and clinical research in severe asthma in children and adults, as well as interesting case reports, perspectives, reviews, systematic reviews, and meta-analyses focusing on topics including, but not limited to, the following:

Phenotypes and endotypes of SUA, with special attention paid to airway sampling; Airway remodeling and its potential management; Eosinophilic and reflux esophagitis as an important example of comorbidity for SUA; Role of obesity in SUA; Strategies for choosing biological medications for SUA.
