Polycystic Ovary Syndrome (PCOS) in Gynecologic Endocrinology

Message from the Guest Editors

Polycystic ovarian syndrome (PCOS) is the most common reproductive endocrinology disorder and the first cause of infertility due to anovulation. Many therapeutic strategies have been considered for inducing ovulation; however, in the case of patients with resistance to clomiphene citrate, there is no gold standard for management. An ideal therapeutic strategy is yet to be identified, and the characteristics of the women who will better respond to each treatment and the main benefits and drawbacks for them are still unclear. The aim of this Special Issue is to describe the medical and surgical strategies used to overcome issues in cases of infertility treatment failure in women with PCOS.

Guest Editors

Prof. Dr. Iwona Bojar

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
