Special Issue

Cutting-Edge Concepts in Knee Surgery

Message from the Guest Editor

Most knee surgeries aside from artificial joint surgery are now treated with arthroscopy, which has become a standard surgical procedure. Around the world, many orthopaedic surgeons passionately find innovative approaches and ways of carrying out trials to share and advance the field of knee surgery. The aim of this Special Issue of *Medicina* is to present new advances in knee arthroscopic surgeries for sports injuries and disorders. This Special Issue is open to studies for new surgical techniques, evolved diagnosis, clinical outcomes, rehabilitation strategies, and current reviews. We invite authors to submit articles related to knee arthroscopy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
