Recent Innovations in Dental Implantology: Clinical Applications and Regenerative Approaches

Message from the Guest Editors

Despite being highly developed and extensively studied, the domain of oral implantology, now integrated on a daily basis into the concept of oral rehabilitation, still leaves many "open doors", particularly concerning factors that influence long-term outcomes. The medical and research community is navigating a complex path that balances traditional and digital protocols, integrates innovative AI techniques into healthcare practices, and seeks to manage risk factors more effectively, all in pursuit of optimal, long-lasting outcomes by means of a combination of biology and technology. Alongside advancements in technologies and implantology in complex medical scenarios or among patients with various chronic conditions, it represents a significant area of interest that remains insufficiently explored and understood. This Special Issue of Recent Innovations in Dental Implantology: Clinical Applications and Regenerative Approaches seeks to showcase the most recent innovations and research findings that improve biological integration, clinical protocols, and long-term success rates, even in complex clinical scenarios and in the presence of comorbidities.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
