

Special Issue

Acute and Chronic Pancreatitis, Pancreatic Malignancies

Message from the Guest Editors

Management of acute and chronic pancreatitis and complications of these diseases has rapidly evolved. However, there are still many clinically important questions to be addressed. The personalized treatment of patients presenting with cystic lesions, benign and malignant tumors of the pancreas is still a challenging and interesting field of medicine.

This Special Issue aims to discuss the trends in the diagnosis and management of pancreatic diseases, share the most recent findings from genetic, molecular and clinical studies of pancreatic diseases, including acute and chronic pancreatitis, cystic lesions and cancer of the pancreas.

We are looking for papers research in molecular and clinical pancreatology, focusing on the molecular mechanisms of pancreatic diseases, novel approaches to the diagnosis, prognostication and treatment of acute and chronic pancreatitis, and pancreatic malignancies. Furthermore, we kindly invite you to share data about the novel methods of interventional, minimally invasive and surgical management of benign and malignant pancreatic diseases.
