

## Special Issue

# Pregnancy: Diagnosis, Misdiagnosis, Complications and Outcomes

### Message from the Guest Editor

In this Special Issue of *Medicina*, I want to touch on several interesting aspects of research in pregnancy. There are many fields in maternal fetal medicine that have not yet been fully explored, for which answers are still needed and guidelines need to be re-written in light of new evidence. Just to name a few, preeclampsia blood pressure cut off is changing in light of the new AHA/ACC hypertension guidelines; for preterm labor, we do not have an effective therapy yet, and not even a reliable early diagnostic method; and twin pregnancy immunology and inflammatory reactions are still a mystery. The following are examples of the unanswered open questions in the field: “Are tocolytics efficacious in twins?”, “Are the standards used to diagnosed gestational diabetes in twins the same as for singletons?”, and “Should fetal lung maturation steroid therapy be the same for twins and singletons?”. This Issue will provide summaries of the current evidences, in addition to new developing discoveries and future directions in the field of maternal fetal medicine.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
