

Special Issue

Techniques, Risks and Recovery of Hip Surgery

Message from the Guest Editors

Background and history of this topic: Hip surgery is a growing field of research. New techniques have recently been developed and they offer some advantages over old techniques. Aim and scope of the Special Issue: The scope of this Special Issue is to publish new research on surgical techniques related on hip surgery, mainly focused on early results, the risks associated with them, recovery, and long term results. Cutting-edge research: New techniques on hip fracture and non-unions, new surgical approaches to hip arthroplasty, new techniques on revision hip arthroplasty, and new approaches to indications for hip arthroscopy comprise topics of interest. What kind of papers we are soliciting: We are looking for articles based on new techniques in hip surgery, related to fractures, arthroplasty, or arthroscopy

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
