Special Issue

Recent Advances in Diagnosis and Therapy of Gynecologic and Breast Cancers

Message from the Guest Editors

In this Special Issue, we invite manuscripts that explore recent developments in identifying biomarkers that offer insights into genetic susceptibility, tumor behavior, and patient outcomes. Contributions on imaging advancements are also highly encouraged. Novel therapies are reshaping the therapeutic landscape and provide exciting avenues for improved patient management. Furthermore, we welcome research detailing innovative immunotherapeutic approaches. In addition, we are particularly interested in manuscripts discussing the advancements in radiotherapy and brachytherapy. Improvements in precision radiotherapy techniques, as well as innovations in brachytherapy for cervical and endometrial cancers, are transforming patient outcomes and reducing treatment-related toxicity. Finally, we invite you to discuss advances in surgical resection and lymph node staging. We also consider breast cancer within the scope of this issue, recognizing its shared genetic, hormonal, and etiological ties with gynecologic cancers. Submissions addressing advances in breast cancer diagnostics and treatments are encouraged, further expanding our collective understanding of cancers.

Guest Editors

Prof. Dr. Daniela-Cristina Stefan

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
