Rheumatic Diseases: New Progress in Clinical Research and Pathogenesis

Message from the Guest Editors

Rheumatic diseases are a diverse group of autoimmune disorders that primarily affect the joints, bones, muscles, and connective tissues. Rheumatic diseases, such as rheumatoid arthritis, systemic lupus erythematosus, Sjögren's syndrome, and ankylosing spondylitis, are chronic diseases that cause a dysregulation of the immune system. Different types of rheumatic diseases are associated with a wide array of clinical manifestations and complex pathogeneses. The purpose of this Special Issue is to encourage researchers to share their latest research and to summarize the recent advances in clinical and pathologic aspects of the rheumatic disease. We invite authors to submit original articles and review articles focusing on pertinent topics and new advances in rheumatic diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
