

Special Issue

New Insights into Diabetes Complications—Diabetic Foot

Message from the Guest Editors

The aim of this Special Issue is to provide a comprehensive platform for state-of-the-art research addressing the complex interplay of factors that underlie diabetic foot development and progression. We seek to highlight novel mechanisms, emerging technologies, and clinical practices that can transform patient outcomes and reduce the socioeconomic impact of this devastating condition. We particularly welcome cutting-edge studies that explore molecular pathways of tissue damage, biomarkers for early detection, advanced imaging techniques, regenerative therapies, bioengineered dressings, and artificial intelligence-driven tools for risk stratification and wound management. Multidisciplinary and translational research, as well as systematic reviews and meta-analyses that synthesize current evidence, are also encouraged. We invite original research articles, comprehensive reviews, and clinical studies that contribute to a deeper understanding of diabetic foot pathology and its prevention. Through this Special Issue, we aim to foster collaboration among researchers, clinicians, and technologists to pave the way toward more personalized and effective care for individuals with diabetes.

Guest Editors

Dr. Álvaro Astasio Picado

Nursing and Physiotherapy Department, Faculty of Health Sciences, University of Castilla-La Mancha, 45600 Talavera de la Reina, Toledo, Spain

Dr. Enrico Brocco

Diabetic Foot Unit, Foot and Ankle Clinic, Abano Terme Polyclinic, 35031 Abano Terme, PD, Italy

Deadline for manuscript submissions

30 July 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
