Special Issue

Gut Microbiota and Gastrointestinal Cancer: Pathways to Progression and Opportunities for Intervention

Message from the Guest Editors

The human gut microbiota, consisting of trillions of microorganisms, plays a crucial role in maintaining overall health, particularly within the gastrointestinal (GI) system. Recent research has uncovered a complex relationship between the aut microbiota and gastrointestinal cancers, which include colorectal, gastric, pancreatic, and esophageal cancers. This Special Issue (SI) aims to explore the various mechanisms by which gut microbiota contributes to gastrointestinal cancer progression, with a focus on microbial-induced inflammation, immune modulation, and metabolic alterations. Additionally, the SI will investigate the emerging opportunities for microbiotatargeted interventions, including probiotics, prebiotics, dietary modifications, and fecal microbiota transplantation, as promising therapeutic approaches to combat cancer and improve patient outcomes.

By integrating cutting-edge research, this Special Issue will contribute to a better understanding of the intricate interactions between gut microbiota and gastrointestinal cancers, providing novel insights that could lead to more effective diagnostic and therapeutic strategies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
