New Insights into Coronary Artery Bypass

Message from the Guest Editors

Coronary artery bypass grafting (CABG) remains the main choice in multivessel disease, providing good long-term results with low complication rates. Currently, the profiles of patients undergoing coronary artery bypass grafting suggest that they are at higher risk than patients in the past. Multiple arterial bypass grafting, especially when associated with anaortic techniques, may lead to the best long-term results. A higher emphasis is being placed on flowmetry in the operating room. An increasing number of cases are being treated with minimally invasive and/or robotic techniques.

We welcome submissions on the best surgical technical approaches, patient selection, indications, graft selection, the results of minimally invasive procedures, the growth of the robotic approach, and strategies for patients with heart failure in order to optimize outcomes in patients treated with CABG.

We invite colleagues around the world to report their clinical experience in coronary artery bypass for this Special Issue of Medicina in order to provide guidance in this fundamental area of the daily life of hospital workers.

We welcome research articles, reviews and other types.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
