New Perspectives in the Treatment of Skin Disease

Message from the Guest Editors

Non-melanoma skin cancers (NMSC) are the most common malignancy in humans, with a higher incidence in chronically immunosuppressed patients. The goal of the treatment is the complete eradication of the tumor while preserving important functionally and aesthetically anatomical structures. Surgical approaches demonstrate a cure rate greater than 90% when appropriate treatment is applied based on the characteristics of the primary tumor and patient. However, many other treatment modalities have been suggested. In selected cases, medical topical treatments can provide a high chance of cure, with generally excellent cosmetic outcomes.

The purpose of this Special Issue is to discuss all therapeutic approaches of NMSCs, giving information about their mechanisms of action, indications, efficacy, side effects, and contraindications.

keywords: Non-melanoma skin cancer; Skin tumor treatment; Basal cell carcinoma; Squamous cell carcinoma; Systemic therapy in NMSC; Topical treatment of NMSC; Non-surgical treatment of cutaneous tumors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
