Infectious and Tropical Diseases: Symptoms, Diagnosis and Treatment

Message from the Guest Editor

Within the last century we have experienced a number of epidemics and pandemics caused by infections including cholera, influenza, Severe Acute Respiratory Syndrome (SARS), Middle East Acute Respiratory Syndrome (MERS), Zika virus and Mpox. There are also infections such as malaria which persistently have a devastating global health burden and will continue to do so for the foreseeable future unless further preventative strategies are implemented. Infectious diseases continue to represent a health problem in all regions of the world. As evidenced by the recent Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) pandemic, new pathogens will continue to emerge and drastically impact all of our lives. The aim of this Special Issue is to further expand and explore our understanding of the aetiopathogenesis, prevention, diagnosis and therapeutics of infectious and tropical diseases. Bacterial, viral, fungal and parasitic infections will all be within the scope of this Special Issue. A range of studies, including case reports and series, cohort and case-control studies, narrative reviews, systematic reviews and meta-analyses, are welcome from all over the world.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
