Recent Advances in Rheumatoid Arthritis

Message from the Guest Editor

Rheumatoid arthritis is a debilitating autoimmune disorder that results in chronic inflammation due to the immune system's attack on healthy tissues. While it is a relatively rare condition, it can cause significant morbidity and mortality in patients, with women being more affected than men. Despite the uncertainty surrounding its pathogenesis, recent years have seen a significant transformation in the management of clinical responses, with several therapeutic modalities offering fewer side effects than traditional treatments. Given the complexity and relevance of this condition, *Medicina* is delighted to announce the launch of a Special Issue entitled "Recent Advances in Rheumatoid Arthritis" to discuss the latest approaches and challenges in the pathogenesis and disease management of rheumatoid arthritis. We, therefore, invite authors to submit their original research, review articles, and case reports to this Special Issue. We hope that the insights presented in this issue will be instrumental in enhancing our understanding of this debilitating disease and in facilitating the development of more effective treatment strategies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
