Craniomaxillofacial Surgery: Latest Innovations and Challenges

Message from the Guest Editors

Craniomaxillofacial surgery stands at the crossroads of science, art, and innovation, addressing complex conditions that impact not only function and aesthetics, but also quality of life. Over recent decades, remarkable progress has been made in the diagnosis, surgical management, and rehabilitation of complex craniofacial conditions, driven by innovations in technology, materials science, and collaborative approaches across medical specialties. Technological advancements such as virtual surgical planning, 3D printing, and navigation systems have revolutionised preoperative strategies and postoperative outcomes. Equally significant is the growing emphasis on interdisciplinary collaboration and patient-centred care, especially in addressing the psychosocial aspects of facial deformities and rehabilitation. We invite colleagues around the world to contribute their clinical experience and/or their research in the field of craniomaxillofacial surgery to this collection of our journal, in order to support the work of oral and maxillofacial clinicians worldwide.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
