Therapy in Rheumatoid Arthritis: Current Evidence and Future Directions

Message from the Guest Editor

Rheumatoid arthritis (RA) represents a chronic immune-mediated inflammatory disease characterized by progressive and irreversible tissue destruction, functional disability, and altered quality of life; it is a complex and dynamic condition, extremely heterogeneous, especially from clinical, serological, and therapeutic outlooks. Choosing a realistic target, depending on the clinical scenario and prognostic factors, has become the actual standard of care in RA, with remission or low-activity disease being the major therapeutic goals. Furthermore, the multistep therapeutic algorithm of the disease clearly emphasizes the true significance of earlier, aggressive, dynamic, as well as individualized RA treatment, frequently adapted to disease activity and therapeutic response. The purpose of this Special Issue is to explore and debate a range of issues around personalized RA management taking into account different RA settings. This is an opportunity for both physicians and researchers at the forefront of the evolving RA therapeutic landscape to contribute to this exciting field, looking beyond remission and into the future of RA management.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
