

## Special Issue

# Management of Gastrointestinal Disorders Related to Infectious Diseases and Medications

### Message from the Guest Editors

Gastrointestinal (GI) symptoms and conditions, including nausea, vomiting, diarrhea, abdominal pain, bleeding and changes in bowel habits, are prevalent manifestations in patients with infectious diseases and those undergoing various pharmacological treatments. These symptoms significantly impact patient quality of life and present frequent challenges in primary care, internal medicine, and gastroenterology settings. Despite their common occurrence, the management of GI symptoms related to infections and medications remains underexplored in the medical literature. This Special Issue aims to address this gap, seeking original research and comprehensive reviews that explore the pathophysiology, diagnostic approaches, and therapeutic strategies for GI symptoms associated with infectious agents and pharmacological interventions. We encourage submissions that investigate the prevalence and burden of these symptoms in various populations, assess the efficacy of current management protocols, and identify areas requiring further inquiry.

### Guest Editors

Dr. Amir Mari

1. Gastroenterology Unit, Nazareth EMMS Hospital, Nazareth, Israel
2. The Azrieli Faculty of Medicine, Bar Ilan University, Ramat Gan, Israel

Dr. Fadi Abu Baker

1. Department of Gastroenterology and Hepatology, Hillel Yaffe Medical Center, Hadera, Israel
2. The Ruth and Bruce Rappaport Faculty of Medicine, Technion, Haifa, Israel

### Deadline for manuscript submissions

15 February 2026
