

Special Issue

Kidney Transplantation Complications: Updates and Challenges

Message from the Guest Editors

The goal of this Special Issue is to provide medical professionals who work with transplant patients with a thorough and up-to-date resource. We encourage contributions that focus on diagnostic, prevention, and treatment approaches and cover both known and new issues. The purpose is to offer a forum for innovative studies that clarify the ever-changing intricacies of post-transplantation issues. We welcome submissions that explore the following topics: Threats from infections: Innovative methods to prevent infections in transplant recipients with impaired immune systems. Novel perspectives on the processes and handling of instances of organ rejection. Immunosuppressive drugs: The immunosuppressive impact over time and new approaches to reducing adverse effects. Technological developments for the diagnosis and monitoring of early problems are known as diagnostic advances. Methods of treatment: new treatments being developed to treat issues following transplantation. We invite original research papers, reviews, and case studies addressing the persistent issue of problems after kidney transplantation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
