Knee Arthroplasty— Advancements in Techniques and Arising Complications

Message from the Guest Editors

Knee arthroplasty is well-regarded for its cost effectiveness, pain relief, and improvement in mobility for an end-stage osteoarthritis. Patient-specific instruments, custom-made implants, fast-track knee arthroplasty, navigations and robotics have been utilised to minimize surgical stress and to improve post-operative outcomes. At the same time, acute and chronic pain control after surgery and early rehabilitation care remain a query that has received unproportionally little attention. Finally, new and modern implants have been introduced for knee arthroplasty, and the criteria for unicompartmental knee surgery have been stretched in recent years.

With this Special Issue, we want to provide an update about current advancements and their contribution in knee arthroplasty techniques and fighting the complications.

The topics of interest for this Special Issue are as follows: current concepts, advancements, novelties, approaches, qualifications, and limitations in total and unicompartmental knee arthroplasty; minimally invasive surgery in knee arthroplasty; patient-specific instrumentations and customized implants; patient-specific alignment (PSA), etc.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
