Advances and Perspectives in Esophageal Cancer Treatment

Message from the Guest Editors

The treatment of esophageal cancer currently comprises a multidisciplinary approach involving several specialties. We are pleased to invite groups with experience in the treatment of esophageal cancer via endoscopic or minimally invasive thoraco-laparoscopic or robotic approaches to share their experiences with us. Additionally, oncology teams or researchers with experience in this field are invited to contribute to this Special Issue, especially in view of the fact that esophageal cancer treatment requires a multimodal approach, including preoperative chemoradiotherapy and chemotherapy, and, more recently, the introduction of immunotherapy, which is contributing to better results in terms of patient survival. We invite contributions from head and neck surgery teams addressing the more specific localization of esophageal cancer, namely, at the cervical level, and the role of surgical and oncological management adapted to this location. The objective of this Special Issue is to highlight different current approaches to the treatment of esophageal cancer and also to share the experience of specialists who have dedicated their careers to caring for patients with this diagnosis.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
