New Strategies for the Diagnosis and Treatment of Autoimmune and Autoinflammatory Diseases

Message from the Guest Editors

Autoimmune and autoinflammatory diseases are very heterogenous in terms of frequency, clinical manifestations and pathogenic mechanisms.

Autoimmune and autoinflammatory diseases are currently believed to be the result of interactions between causative factors (e.g., environmental factors), genetic predisposition, autoantigens, disturbances in self-antigen tolerance and the mechanisms of apoptosis.

Taken to the immense heterogeneity of etiopathogenic mechanisms, diversity in terms of susceptibility to the disease, clinical phenotype and disease progression as well as the response to applied drugs, there is an extreme need to individualize health care and therapeutic approach along with further studies to elucidate mechanisms underlying autoimmune and autoinflammatory diseases.

The aim of this Special Issue is to draw attention to current trends and milestones in the diagnosis, treatment, clinical course and progression assessment, as well as experimental studies on the etiopathogenesis, of these diseases.

We invite colleagues from all over the world to submit original and review papers as well as case reports.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
