

Special Issue

Research on Oral and Maxillofacial Surgery

Message from the Guest Editors

We are honored to be the of this Special Issue, entitled In recent years, Oral and Maxillofacial Surgery has experienced significant advancements in materials, techniques, and technology. These significant achievements have resulted in many clinical benefits, that enhanced diagnostic accuracy, allowed to formulate more precise treatment plans, and improved treatment predictability, safety, and efficiency, as well as overall patients' experience. We have identified four main domains that, as health professionals, we should always consider during our clinical practice: 1. patient centrality, 2. treatment efficacy, 3. treatment effectiveness, and 4. quality of care. These concepts should be applied in all medical fields, including Oral and Maxillofacial Surgery. This Special Issue welcomes all kinds of research papers aimed at proposing, describing, and evaluating novel procedures and approaches in Oral and Maxillofacial Surgery, intended to enhance the above-described domains.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
