Diagnosis and Treatment of Diseases of the Facial Skeleton, Oral Cavity, and Paranasal Sinuses

Message from the Guest Editors

Diseases of paranasal sinuses are quite often diagnosed and treated with a multidisciplinary approach. It seems that nowadays, literature mostly focuses on endoscopic approaches to the sinuses, but what about a Caldwell-Luc procedure or other more invasive approaches; should they also be used nowadays? Nowadays, there are a lot of methods and materials that can be used quite easily to ensure not only maxillary bone stability but also to reconstruct the sinuses walls and enable good air patency along the sinuses, without any cases of mucous accumulation or inflammatory process formation within the sinuses.

The aim of this Special Issue should be discussed in articles, reviews, and case reports concerning various diseases, pathologies, clinical relevances, new outcomes and perspectives, and interesting surgical, and pharmacological treatment of not only paranasal sinuses but the entire scope of co-related diseases of adjacent structures. Moreover, special attention should be focused on the scope of diseases, differential diagnosis, good adequate diagnostics, regenerative techniques and reconstruction, and improved approach towards the paranasal sinuses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
