# Point-of-Care Ultrasound: Current and Evolving Clinical Applications in Emergency Medicine

### Message from the Guest Editor

Point-of-care ultrasound (POCUS) is the medical use of ultrasound technology by appropriately trained clinicians to answer specific clinical questions. Nowadays, POCUS is an additional adjunct in the emergency physician's toolbox. When integrated into clinical examination, it has been shown to significantly improve diagnostic accuracy and therapeutic decision making. POCUS is increasingly utilized across a broad spectrum of emergency medical conditions. Within a well-defined scope of practice, POCUS indications and novel applications in the emergency setting are increasing exponentially. In this context, we are launching a Special Issue in *Medicina* entitled "Point-of-Care Ultrasound: Current and Evolving Clinical Applications in Emergency Medicine". This Special Issue aims to provide a comprehensive and updated overview of POCUS's value in a variety of clinical scenarios in emergency physicians' everyday practice. Original research articles, reviews and meta-analyses covering this topic are of particular interest and welcomed in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
