Special Issue

Personalized Medicine for Patients with Respiratory Disease

Message from the Guest Editor

Traditionally, treatments for conditions such as asthma, chronic obstructive pulmonary disease (COPD), pulmonary fibrosis, and pulmonary embolism have followed a one-size-fits-all approach. However, the heterogeneity observed in disease progression, response to treatment, and patient outcomes has necessitated a more nuanced approach. With the advent of high-throughput technologies, advanced imaging, and bioinformatics, we are now equipped to analyze vast amounts of data at an unprecedented scale, paving the way for more precise and effective interventions in respiratory medicine. This Special Issue on "Personalized Medicine for Patients with Respiratory Diseases" aims to explore the latest developments and innovations in this burgeoning field. Our objective is to provide a comprehensive overview of how personalized medicine is reshaping the landscape of respiratory healthcare. This Special Issue will feature cutting-edge research that showcases the application of personalized medicine to respiratory diseases. We look forward to receiving your contributions and advancing the field together.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
