

## Special Issue

# Advances in Diagnosis, Treatment, and Prognosis in Glomerular Diseases

### Message from the Guest Editors

Glomerular diseases represent a highly heterogeneous group of diseases with significant impacts on renal outcomes and overall prognosis. In recent years, substantial progress has been achieved in unravelling the underlying mechanisms of glomerular injury, developing more precise diagnostic tools, and refining therapeutic approaches. Novel biomarkers, advanced imaging techniques, and genetic studies have broadened our understanding of disease pathogenesis and improved our ability to classify glomerulopathies.

Importantly, treatment strategies are shifting from nonspecific immunosuppression toward targeted therapies, guided by a deeper knowledge of molecular pathways. The introduction of B cell-depleting agents and complement inhibitors is changing the landscape of clinical management.

This Special Issue will provide a platform for high-quality contributions that advance the field of glomerular diseases. We welcome the submission of original research articles, systematic reviews, and meta-analyses that explore any aspect of glomerular disease. By integrating clinical, translational and basic science perspectives, this Special Issue will provide a comprehensive overview of this field.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
