Chronic Respiratory Diseases: Updates on Pathophysiology, Symptoms, Diagnosis and Treatment

Message from the Guest Editors

Chronic respiratory diseases are posing a considerable burden to society, patients, caretakers and medical professionals. In addition to the well-known contributing factors, air pollution and climate change have emerged as new reasons for the increase in the frequency of diagnoses and exacerbations of chronic respiratory conditions. Simultaneously, novel aspects of respiratory pathophysiology are being described, new management modalities introduced, and treatment paradigms revisited and modified. In this context, we are honored to invite you to submit your valuable contribution to the new Special Issue of *Medicina*, aiming to provide a comprehensive insight into the novel trends in research and clinical management of chronic respiratory diseases, including, but not limited to, asthma, chronic obstructive pulmonary disease, pulmonary fibrosis, chronic rhinosinusitis, allergic rhinoconjunctivitis and other conditions. Reviews, original research, case reports and case series descriptions, as well as real-world data presentations are contribution formats that we invite you to submit. We encourage you to be part of this fascinating project!

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
