New Trends in Chronic Obstructive Pulmonary Disease (COPD)

Message from the Guest Editors

Chronic Obstructive Pulmonary Disease (COPD) represents a significant and escalating global health burden. The purpose of this Special Issue is to explore and disseminate the latest developments in COPD research and clinical practice. We invite contributions that address a wide array of topics, including but not limited to novel therapeutic approaches, advances in non-pharmacological management, patient-centred care models, innovations in diagnostic and monitoring technologies, epidemiological studies, and the impact of environmental and genetic factors. We are particularly interested in research that highlights multidisciplinary and integrative approaches to COPD care, as well as studies that consider the challenges and opportunities in diverse healthcare settings globally. By bringing together a broad spectrum of perspectives and expertise, this Special Issue aims to foster a comprehensive understanding of COPD and inspire future research and clinical innovations. We look forward to your valuable contributions to this important discourse.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
