Special Issue

Advances in Otorhinolaryngologic Diseases

Message from the Guest Editors

Giant steps have been taken forward in helping patients with hearing loss, from precise neonatal, or even intrauterine, diagnosis, to tremendous hearing results in ear or brain implantology. The endonasal approach for many tumors led to a resurgence in rhinology, as it involves less surgical mutilation, shorter postoperative hospitalization, and most importantly, greater overall survival for patients. Outcomes of immunotherapy treatment in patients with recurrent nasal polyposis are constantly evolving, and head and neck robotic surgery has given a new perspective for minimally invasive cancer management. As rhinoplasty surgeries provide many advantages, both physical and psychological, it is important to achieve improvements in different approaches and techniques. Esthetic surgery is not only important for adult patients, but also for children; for example, auricular reconstruction for microtia remains a challenging procedure.

We invite colleagues from around the world to report their clinical experiences, and contribute research articles, reviews, or case series comprising all otorhinolaryngologic diseases to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
