Recent Advances in the Treatment of Breast Cancer

Message from the Guest Editor

Breast cancer is acknowledged as an international priority in healthcare. It is currently the most common cancer in women worldwide, with a continuous increase in incidence. In recent years, cancer research has allowed us to introduce new systemic treatments into clinical practice. Nonetheless, the constant need to improve the therapeutic approach to this disease remains a target to be pursued daily in research activity. The aim of this Special Issue is to underline the evolution of the treatment of early and advanced breast cancer through reviews of the scientific literature or meta-analyses. At the same time, this Special Issue is aimed at original papers with an exploratory nature investigating new and original therapeutic pathways.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
