

Special Issue

The Diabetic Foot: Recent Advances and Future Developments

Message from the Guest Editor

In this issue, we will discuss how innovative approaches and smart technologies may optimize the management and prevention of foot ulceration by identifying high-risk patients for timely interventions, personalizing foot ulcer offloading, and improving adherence to protective footwear.

In addition to advances in established treatment modalities, such as the management of infections and osteomyelitis, there has been a renaissance of local treatments including topical oxygen therapies. Furthermore, psychological stress and, in particular, depression have gained recognition as important determinants of foot ulcer development and impaired healing, while growing insights into the biomechanics of the diabetic foot have resulted in more effective foot ulcer prevention and treatment.

These are some of the many scientific developments in the field of the diabetic foot. We therefore encourage original publications that would further advance our medical knowledge of this all too common and devastating complication of diabetes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
