

Special Issue

Diagnosis and Treatment of Distal Radial Fractures

Message from the Guest Editors

The journal *Medicina* launched a Special Issue titled "Diagnosis and Treatment of Distal Radial Fractures". Fractures of the distal radius represent the most common orthopaedic injuries: one out of every six fractures presented at emergency departments is a distal radius fracture. Given the frequency of distal radial fractures in traumatology in different ages, the journal *Medicina* is launching this Special Issue. We encourage you and your co-workers to submit your articles reporting on this topic. Reviews or original articles, with the aim to update on diagnosis and treatment of these fractures, with attention to new tendency in clinical practice.

Guest Editors

Prof. Dr. Gianluca Testa

Dr. Ludovico Lucenti

Dr. Marco Sapienza

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.
