Current Advances in Diagnosis and Surgical Treatment of the Head and Neck Disorders

Message from the Guest Editor

The journal *Medicina* launched a Special Issue titled "Current Advances in Diagnosis and Surgical Treatment of the Head and Neck Disorders". Head and neck diseases comprise a very wide range of the spectrum of diseases and often require specific approaches from head and neck/craniomaxillofacial surgeons, general otolaryngologists and plastic surgeons, as well as dentists, ophthalmologists, neurologists/neurosurgeons, and speech and physiotherapists. Our specialty of head and neck surgery and medicine is currently experiencing a period of active and innovative change in technology and techniques. As the for this Special Issue, I look forward to accepting high-quality articles that present thorough findings concerning surgical and/or non-surgical procedures, which are becoming increasingly common in practice, in order to cover this wide range array of the topics, introduce an important and practical reference to our specialty, and provoke productive discussions among academia. I am delighted to provide a well-organized and expert exploration into this growing area of head and neck surgical practice via a Special Issue to our specialist readership.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania
