Imaging of the Kidney and Urinary Tract

Message from the Guest Editors

Kidney and urinary tract diseases represent a major health problem with an increasing impact on the health of the population. Today, specialists in medical imaging must acquire specific competences in order to meet clinicians' new needs. An integrated and multiparametric imaging approach is increasingly needed to characterize and stage lesions. This requires knowledge of the different pathologies of the urinary system, of the treatment options, and of the possible treatment-related complications. Today, the radiologist must know what specific information to provide to the surgeon in different clinical situations and what are the features of the various organs after surgery and after different mini-invasive procedures. International guidelines provide for an increasingly less-invasive approach for the treatment of various diseases of the kidney and urinary tract, whose indications are often placed on the basis of integrated multiparametric imaging. Minimally invasive treatments for tumor therapy also require a precise guidance that imaging guarantees, and the success of the procedures can only be assessed with imaging methods.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
