Special Issue

New Perspectives in Laparoscopic Liver Resection

Message from the Guest Editor

Laparoscopic liver resection has been rapidly developed and propagated. Many reports about short-term outcome and oncologic benefit of laparoscopic liver resection for malignant tumors have been published. However, laparoscopic liver resection has not been accepted for standard treatment of hepatectomy because of surgical difficulty and reproducibility. In this Special Issue, we will invite evidences, technical improvement, and expert perspectives of laparoscopic liver resection.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
