

Special Issue

Management of Bipolar Disorder

Message from the Guest Editors

The aim of this Special Issue is to invite researchers to submit scientific and clinical work on relevant clinical aspects of bipolar disorder over the lifespan. Especially, studies focused on the handling of symptoms in daily life, specific aspects of diagnosis and treatment in younger and older patients, as well as gender aspects and long-term changes such as cognitive disturbances or subsyndromal symptoms are welcome. Articles dealing with issues related to working with bipolar disorder, family aspects, role of support groups, and issues emerging when special groups such as physicians, psychiatrists, or psychologists suffer from bipolar disorders will be included in this Special Issue.

- Bipolar disorder in daily life
- Diagnosis and diagnostic problems
- Co-morbidity
- Long term treatment
- Subsyndromal symptoms
- Cognitive disturbances and chronicity of symptoms
- Working with bipolar disorders
- Family
- Concepts of support groups
- Bipolar disorder in older life
- Health workers with bipolar disorders

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief
