Advances in the Management of Shoulder Pathologies

Message from the Guest Editors

Shoulder pathologies are one of the most common musculoskeletal problems. They encompass a broad range of different conditions, including dislocations, rotator cuff tears, and osteoarthritis. They produce pain and loss of function of the affected arm, being one of the major causes of reduced work activities, with decreased health-related quality of life and representing a high cost for national health systems. In recent years, orthopedics has embraced innovations and new techniques with the aim to improve the standard of care and reduce associated costs. Therefore, the purpose of this Special Issue is to highlight new advances in the field of shoulder disease, taking into account pathogenic factors, bio-engineering, new implants, and the use of new technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
