Psychocardiology – the Mind-Body Interaction

Message from the Guest Editors

Next to direct organ damage with clinical correlates (e.g., stroke with mobility and/or cognitive deficit), heart disease is closely related with patient quality of life, patient perception, and coping with chronic disease. These aspects are frequently neglected in clinical practice, which is primarily focused on the physical rather than psychical implications of the disease. However, the field of mind–body interaction, psychocardiology in this respect, is an intriguing and interesting field that grows steadily. This issue of the *Medicina* is dedicated to research in psychocardiology at large, with primary emphasis on patient perception of chronic disease, and interventions which help the patient to cope with the disease. We also welcome contributions in a broader sense of chronic disease and in advanced stage, when body wasting is detected, and the psychological impact of the disease is more pronounced. Finally, systematic and narrative reviews as well as viewpoints to challenge the current boundaries and the potential to advance the field will be considered for publication.

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
