

Special Issue

Clinical Psychopharmacology and Toxicology

Message from the Guest Editor

We encourage you to participate in the upcoming Special Issue and submit their research work in order to contribute to the expansion of rather limited knowledge on the therapeutic use of psychotropic medication, in addition to well-known traditional psychological/psychiatric interventions, for the treatment of mental disorders and promotion of overall patient health and well-being, as well as on overdoses with (il)legal psychoactive substances (including novel compounds). Original research articles and reviews are welcome to be submitted. Research areas may include, but are not limited to, the following: clinical psychopharmacology, clinical toxicology, psychotropic drugs, psychoactive substances, and psychiatry.

About the Journal

Message from the Editor-in-Chief

Medicines (ISSN 2305-6320) is an international, peer-reviewed, and open-access journal aimed at disseminating cutting-edge research in the field of drug discovery and clinical application. It publishes original research papers, research communications, letters, and systematic reviews. The contents of the papers handled are manufacture of new drugs, exploration of drug-delivery systems, therapeutic effect, action mechanism, and their modulation by intrinsic and extrinsic factors. We look forward to handling your contributions in the very near future.
