Special Issue

Interventional Cardiology and Vascular Medicine

Message from the Guest Editor

Cardiac and vascular diseases represent the leading cause of death worldwide. The limits of interventional cardiology are going to expand new patient subsets, which is also due to the growing variety of procedures that can be performed. Moreover, patients that are currently being treated have more comorbidities and require specific skills due to the aging population. In this Special Issue, we will discuss current challenges in interventional cardiology and peripheral interventions, as well as specific supports to cardiac interventions such as mechanical circulatory supports. We will also discuss advancements in cardiac structural interventions.

Guest Editor

Dr. Alessandro Durante

About the Journal

Message from the Editor-in-Chief

Medicines (ISSN 2305-6320) is an international, peer-reviewed, and open-access journal aimed at disseminating cutting-edge research in the field of drug discovery and clinical application. It publishes original research papers, research communications, letters, and systematic reviews. The contents of the papers handled are manufacture of new drugs, exploration of drug-delivery systems, therapeutic effect, action mechanism, and their modulation by intrinsic and extrinsic factors. We look forward to handling your contributions in the very near future.

Editor-in-Chief

Prof. Dr. Hiroshi Sakagami

Meikai University Research Institute of Odontology (M-RIO), 1-1 Keyakidai, Sakado, Saitama 350-0283, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within PubMed, PMC, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 45 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
