Special Issue

Acupuncture – Basic Research and Clinical Application

Message from the Guest Editor

This Special Issue focuses on the further investigation, development, and modernization of acupuncture in basic research settings, as well as in clinical applications. We welcome papers reporting latest evidence-based results of high-tech acupuncture research, and those exploring acupuncture in general. Studies concerning modern technology in acupuncture research are especially welcome. Manuscripts should deal with, but are not limited to, the keywords listed below.

- Modernization of acupuncture
- basic research
- traditional and modern needle acupuncture
- laser acupuncture
- electroacupuncture
- ear acupuncture
- animal experimental studies in acupuncture
- evidence-based complementary medicine
- acupuncture in clinical application and practice

About the Journal

Message from the Editor-in-Chief

Medicines (ISSN 2305-6320) is an international, peer-reviewed, and open-access journal aimed at disseminating cutting-edge research in the field of drug discovery and clinical application. It publishes original research papers, research communications, letters, and systematic reviews. The contents of the papers handled are manufacture of new drugs, exploration of drug-delivery systems, therapeutic effect, action mechanism, and their modulation by intrinsic and extrinsic factors. We look forward to handling your contributions in the very near future.
