

Special Issue

Safety of Herbal Materials

Message from the Guest Editor

Herbal materials are resources of various herbal medicines, including traditional herbal medicines, dietary supplements, and functional cosmetics. Increasingly, consumer and regulatory agencies demand scientific evidence, efficacy, and safety with regard to the products and services sold by industries in the fields of integrative (including complementary and alternative medicine) and traditional medicine. In this current Special Issue, safety of herbal materials is a theme and submission of manuscripts is highly encouraged. See the key words.
