Contemporary Endocrinology

Message from the Guest Editor

Dear Colleagues,

Aim

Endocrinology and metabolism are rapidly advancing fields of medicine. The quantity and quality of research in these sciences keeps pace with the epidemic proportions of endocrine and metabolic disease. This Special Issue on Contemporary Endocrinology encourages original work and thoughts which have diagnostic, clinical, or public health relevance. The issue aims to explore the vast spectrum of endocrinology, and highlight its expanding horizons.

Scope

Newer insights in

- Pathogenesis;
- Diagnosis and monitoring;
- Management;
- Prevention/public health of endocrine disease.

Dr. Sanjay Kalra
Guest Editor

Deadline for manuscript submissions:
31 July 2021
