Special Issue

New Advances in Infertility Therapy

Message from the Guest Editors

The field of fertility is in constant evolution and has experienced major breakthroughs since the development of ART technologies. This Special Issue aims at discussing the recent advances in fertility treatment. It will focus on different therapies proposed to improve ART outcomes and/or patient comfort, whether they have been validated and are routinely used or are still under assessment. This Special Issue will provide an overview of the novelties in fertility therapies and which technologies/techniques to expect in the near future in fertility clinics.
