

## Special Issue

# Traditional Surgery and Minimally Invasive Approaches to Valvular Heart Disease

### Message from the Guest Editor

It is a great honor for me to participate as for the Special Issue of the prestigious journal Medical Sciences. The Special Issue aims to analyze the results of traditional aortic valve replacement surgery and to address the issues related to the new micro-invasive aortic valve replacement techniques, i.e., TAVR, as well as mini-invasive (thoracotomy access, rapid deployment or sutureless valve implantation), in order to offer each patient all the valid options for the best possible treatment of aortic valve disease. At the same time, the Special Issue aims to focus also on the technical aspects and the results of mitral valve repair surgery with both minimally invasive and traditional approaches, as well as the treatment of tricuspid diseases.

### Guest Editor

Dr. Paolo Nardi

Cardiac Surgery Division, Tor Vergata University Hospital, Tor Vergata University of Rome, 00133 Rome, Italy

### Deadline for manuscript submissions

28 June 2026

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, MEDLINE, CAPus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
