Allergic Rhinitis: Epidemiology, Prevention and Management

Message from the Guest Editor

Allergic rhinitis is a common respiratory disease that not only can strongly affect the quality of life of many patients but also can be detrimental to work performance and generate productivity and healthcare costs. Inflammatory mechanisms are nowadays better understood, which allows us to synthesize more effective treatments and to establish specific guidelines to facilitate prevention and management of the disease, specially to avoid complications that may appear. This Special Issue will focus on the causes underlying the occurrence of allergic rhinitis, on the strategies to prevent it and other comorbidities, the patient monitoring during diagnostic, development and treatment of the disease and on healthcare management.

Guest Editor

Prof. Dr. Hideyuki Kawauchi

Distinguished Invited Researcher, Department of Microbiology,
Shimane University, Faculty of Medicine, Matsue, Japan

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Antoni Torres

1. Institut D investigacions August Pi I Sunyer (IDIBAPS), Department of Pulmonology, Hospital Clinic de Barcelona, Universidad de Barcelona, 08036 Barcelona, Spain

2. Centro de Investigación Biomédica en Red en Enfermedades Respiratorias (CIBERES), Instituto de Salud Carlos III, 28029 Madrid, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, MEDLINE, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
