

## Special Issue

# The Role of Diet and Supplements in the Prevention and Treatment of the Metabolic Syndrome

### Message from the Guest Editors

Metabolic syndrome (MetS) has become a serious health problem as its *prevalence* is *increasing* worldwide. It refers to the co-occurrence of a cluster of cardiometabolic risk factors, including obesity, hypertension, dyslipidemia and insulin resistance. Nutrients, dietary patterns and supplements have proven beneficial and could exert protective effects against MetS. This Special Issue aims to bring together the latest research on the role of diet and supplements in the prevention and treatment of the MetS. Manuscripts presenting clinical research, observational and analytical reviews in the MetS area are encouraged for this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Antoni Torres

1. Institut D investigacions August Pi I Sunyer (IDIBAPS), Department of Pulmonology, Hospital Clinic de Barcelona, Universidad de Barcelona, 08036 Barcelona, Spain

2. Centro de Investigación Biomédica en Red en Enfermedades Respiratorias (CIBERES), Instituto de Salud Carlos III, 28029 Madrid, Spain

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, MEDLINE, CAPus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
